Note to Bill of Materials:
 Drill out and weld new B+ leadhead to B+ terminal on this battery.
 Replace battery connector & lugs.

Contact is james.burford@ship8.com

WORK PERFORMED: Quote approved. Travelled to shop. Picked up parts. Returned to site. Accessed lift. Lead head snapped battery post off flush with the top of the cell. Carefully cleaned and abraded remaining lead to remove minimal material while ensuring good contact surface. Cleaned battery. Carefully cleaned in additional material to build up battery post. Once built up, welded on new lead head, installed new terminal, replaced sb350 routed and secured terminals, heat shrunk ends, cleaned entire battery top and applied protectant to minimize regrowth of corrosion. Battery case is badly degraded due to corrosion. Replaced it, but still serviceable. Tested and returned to service.
 Marcus Baumgartner (2024-06-05)
