WORK PERFORMED: Picked up parts, travelled to site. Unable to locate truck at 311 after extensive search. Checked customer list and found that truck at 550. Travelled to 550. Located truck. Wired and installed overhead fan. Routed wires through mast. Disassembled access 1 cover, removed and fabricated mounting hole for switch. Installed. Installed and routed wiring. Found that truck is not equipped with the required sub harness. Attempted to find an adequate wiretapped power point, but unable to. Attempted to download wiring manuals, but crown 360 inaccessible due to low connection strength, and will return with wiring manual to fit power properly.
 Marcus Baumgartner (2024-07-23)
 Returned to site. Located power tap suitable for fan power, fabricated wiring sub harness. Installed. Tested and returned to service.
 Marcus Baumgartner (2024-07-25)
