WORK PERFORMED: Traveled to customer site. Checked in and moved to work area. Spoke with customer, began troubleshooting. Voltages on batteries are good, voltage to pump is good. Eventually found operator error as problem. Operator was attempting to start boom lift up with foot on presence pedal, you can not do this with genie boom lifts, foot must remain off pedal until after start up process. Customer is going to run lift for a couple days to verify this is the problem.

Kendall Stephens (2024-10-23)

Customer replaced batteries on there own this work order is for diagnostic

Chris Mangieri (2024-10-25)

Batteries were low on water and old there's a mix match of batteries in the truck which causes the older batteries to work harder and when a load is applied it will cause truck to have issues

Chris Mangieri (2024-10-25)
