Truck Charge	1.0	\$85.00	\$85.00 T

- SA-2257281 -

1/14/2025 Richard Victorian: Arrived on site. Panel is normal. Checked history panel was in supervisory on 1/11/25 for sep 7 which in a power supply. Supervisory cleared on that day and has been normal since then. Walked to power supply. Everything appears to be fine. No signs of water damage. Modules and power supplies have been susceptible to water damage in the past. I don't see any hanging devices that would cause a power supply trouble. If trouble returns MAY need a lift since devices are located at the beams. Panel normal upon departure.

John Poole requested service 254-258-4955
