

EEC Publish Version 250211

Accounting Part

1. Add GL Account column on OAE Credit Memo Edit page
2. Add Delete button on Entry Detail page.
3. Add column Item Detail to display item and qty on Match Report/View.
4. Add Retail Order No. column and E&E SO No. column on Consignment Order List page

Customer Service Part

1. Add query condition Validated on sales order list page.
2. Don't allow to quote at pallet level if oversize pallet exists for the order under related loc.

EDI Part

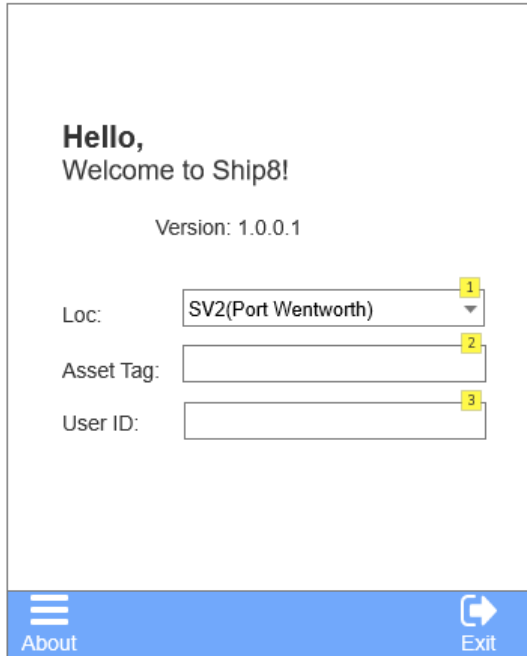

1. Revise 820 to record IT1 segment information.

Warehouse Part

1. Revise WDC Bin Layout Diagram page to sorting bin by Aisle setting.
2. Add column Billing Only/Stage Bin on Wholesale Order Changes Report, click to display the Bin Loc and cancelled qty after picked.
3. Implement Shopify API for 3PL customer.
4. Implement new small package carrier TEMU Shipping, similar to Walmart Shipping.
5. Create Outbound Load Notification page under warehouse management/Maintenance.
 - Use to maintain recipients' email address for carrier and customer.
 - Send Outbound Load notification to Carrier when Trailer/Wholesale Shipment is completed.
 - Send Outbound Load notification to Customer when related shipment is Completed.
6. Revise wireless app Bin Transfer to support virtual shipping pallet.
 - Original PLP Pallet will be invalid if virtual shipping pallet is printed, **user need to scan virtual shipping pallet label to do the transfer.**
7. Allow to config different Auto batch rule for dealer when Ollix is selected.
 - Only need to select dealer which needs separate rule.

8. Revise Android Wireless Application to scan Asset tag when login.
 - Require user to do check list when login the asset tag first time on the day.
 - This will replace the current equipment mgt. application for Check IN ONLY, the Check Out still needs to use current equipment mgt. application.

9. Revise DS and WMS Picking to filter bin by Equipment Functional Group when alter bin.
 - Create Equipment Functional Group Maintenance page to maintain function group for Equipment Category.
 - Add Equipment Functional Group at Bin Master page.
 - Allow all picker to have alter bin function, Alter Bin list button only visible for user with alter bin admin only.
 - This ONLY apply to Android application, and needs to install the latest android application.
10. Add Oversize Pallet tab on wireless app Picking/WMS Picking List Item Detail Form and Shipping/ WMS Pallet Build Form.
 - Scan to mark the Pallet as oversize.
 - Revise Olliix Carrier quote service to auto calculate item class for pallet, so DC does NOT need to submit carrier pallet on routing sheet page.
