Shipping office unit stopped cooling Monday and started back cooling Tuesday I performed s full evaluation on the system and discovered that the system is operating normally at this time pressure was 118 over 277 nothing electrical is over amping and the fan capacitor is testing within range the trane package rtu does have a relatell board in it and when we have power surges those board do have tendency to lock out and has to have the power reset in order to unlock the board. The system is running and cooling properly at this time

Thank you for allowing Bolton Air to serve your HVAC needs. We appreciate your business!

All services are due upon receipt unless otherwise stated. Late fees will apply to unpaid invoices over 30 days.

A 3.5% processing fee applies to all credit card payments.

Due to the increases in material costs due to tariffs, Bolton Air reserves the right to adjust the price of the Goods by an amount reasonably reflecting the additional tariff costs incurred if the need should arise.

Pricing is only valid for 14 days from the Proposal date.
