4/17/2025 Scottie Campbell: On arrival system has a power supply active supervisory. Located power supply West side of building just passed the trucking office. Power supply has an open circuit number four and needs a 40 foot scissor lift to troubleshoot. Customer stated that he would like to have that point put on test until we can get back out with the lift to troubleshoot and repair. CMS has put the point on test until October once Summit is done with the repair. It can be put back online. System is red tag
