11/27/19	Gabriel Castillo	Booked/Routed cubic feet (âcubeâ?) of shipment compared to PO cube is outside of allowed tolerance. âPO cubeâ? is defined as the total cubic feet of all cartonized/packaged goods on the PO, and is shown in the âTotal Volumeâ section of the PO. The "PO cube" for this order was: 89. The cube provided during the routing/booking process was: 101. For more information on cube (location on purchase order, calculating, calculating for palletized orders, etc) please refer to page 16 in the At Home Domestic Shipping & Packing Manual and page 25 in the At Home Import Shipping & Packing Manual.
11/27/19	Linda Di	PO# 1721168 contains two parts, one is 1.85 CBM, the other part is 1.01 CBM, totally 2.86CBM which is equal to 101 cubic feet, it is same as FCR, so we deny this case.
