

MN FABS

Exporters of Quality Home Textiles

The Company

For nearly 10 years now, combining expertise with a passion for excellence has been the catalyst for our growth. Visionary management at the helm has inspired our work force to reach for higher levels of accomplishment. Our finger has constantly been on the pulse of international trends in designs and technological advances. This, combined with the dedication of our team to customer delight, has resulted in our ever growing base of satisfied clients.

Infrastructure

NMT International, we recognize that the very basic of smooth functioning with art infrastructure with 18,000 sq. ft. of dedicated floor space. Our ultra modern machinery, contemporary facilities and a highly monitored work-force are the very foundation of our success.

Special facilities also include handloom, auto loom, dyeing factory and a well designed showroom. At present we have a manufacturing capacity of 1,00,000 meters of fabric and 50,000 sets of made-ups per month. And we are growing every year.

Machinery

Our production unit is equipped with top of the line machinery to guarantee efficacy in our production. We have more than 30 Juki sewing machines and a Compunic-INS-300-6020, a needle detector machine to ensure metal free products and finishing machines to assure us of the final touch to our products. Indvac vacuuming machine to vacuumize the cushions, steam ironing machine, cutting machine and an oil-stain removing/steam genset machine.

Quality Assurance

We are doing scrupulous checks and inspections at every stage of production ensure that our products effortlessly meet every international, as well as our own standard of excellence. In keeping with our commitment to enhancing the satisfaction of our valued clients our adherence to quality management systems is stringent as is our dedication to timely delivery of consignments.

We also believe in going that extra mile. Before shipment our products are sent to a number of textile committees and institutions for further validation of their quality. These includes ITS, SGS ect.

We have a dedicated Designer for Product Development.

Also can develop designs, weave, new textures, products from customer theme boards.

Can Supply comprehensive range of finished household products.
