Heartleaf Collection

Our product is artisanal, hand-crafted and sustainable in many ways. The livelihood it offers artisans and crafts people, supports safe and decentralised production. We ensure the benefits of fair-trade to the maker. Using recycled material - metal scrap brass from factories and old brass utensils, ensures minimal environmental impact.

Besides this there is something special about giving someone a handmade product. When you give a handmade gift, you are giving a piece of creativity and skill, making it truly personal and meaningful. It is unique and one-of-a-kind, unlike mass-produced items that can be found everywhere. Handmade products are made in small batches, and each piece is not an exact replica - making it something truly special and exclusive. A wonderful way to show someone that you care for them and the environment.

Ancient yet modern, traditional yet contemporary, pottery has been a medium of creative expression in every culture. At Adhya, the addition of ceramics to our repertoire has brought young energy and new possibilities of material fusion - exploring and discovering fresh aesthetic directions.

Our studio is equipped with basic pottery wheels and slab roller for precise shaping and forming. The advanced electric kiln ensures consistent and controlled firing, allowing us to achieve optimal results with both low-fire and high-fire ceramics.

We have been experimenting with glazes; rustic and glossy, hand painted, added grog, paper, double-fired, dripped, sprayed, and mixed effects to create a library of textures and finishes.

This food-safe material is great for cake-stands, bowls, platters and also for large decorative wall art or hanging mobiles that are light weight. Get in touch for your tabletop and decor requirements. We enjoy experimenting and are open to small batch orders.
