

# Fashion Care

## **About Us**

Fashion Care was first launched in 2010 as a small entrepreneurial venture by **Mr R Kumaresan** trading across South India. Today it has grown into recognized export house manufacturing 100% Organic Cotton tote bags, aprons and home textiles products like bed sheets, cushions covers. At Fashion care we strive to make products which are fairly made, ethical sourced and sustainable in creation.

### **Our Sustainable Business Model**

The fame of apparel business is anchored in faster production runs, producing higher quality products and excellence of service to the end user. But times change, and today we find ourselves functioning in a very different and challenging business climate - one that requires us to embrace the negative impact of unethical garment production that has left an impact on people and the environment.

At Fashion care we strive to make products which are sustainable in creation. We visibly reinforce our commitment to organic cotton supply chain and passion for closed loop sustainable production.

### **Fair Working Conditions**

We are strongly committed to ensuring good working conditions. Working conditions in the production factory are complied with local/national standards. Health and Safety conditions are clearly explained to all staff and workers with regular reminders on PPE. are in place to detect, avoid, record and respond to risks and accidents.

### **Supporting Communities**

The excess fabric and defective products collected in the factory are donated to non-profit partners and sorted for repair or remade into handicraft products. This provides jobs for people within the community. The funds raised in the sale of items are kept by our non-profit partners.

We are contributing and sharing our margin from our business to the farmer's Welfare Association. The funds are utilised for farmer's children education.
